Ideation Phase: Define Problem Statements

Customer Problem Statement Framework — Global Olympic Analysis

Date: 31 January 2026	**Team ID:** NOC-PERF-2026
Project Name: Global Olympic Sports Performance Analysis	**Maximum Marks:** 4 Marks

Customer Problem Statement Overview

Creating a structured problem statement ensures teams focus on the exact operational barriers and user emotions experienced across sports strategy, grant funding, and broadcast media storytelling.

Component	Description & Prompt
I am	Describe customer with 3-4 key characteristics — who are they?
I'm trying to	List their outcome or 'job' they care about — what are they trying to achieve?
but	Describe what problems or barriers stand in the way — what bothers them most?
because	Enter the 'root cause' of why the problem or barrier exists — what needs to be solved?
which makes me feel	Describe the emotions from the customer's point of view — how does it impact them emotionally?

Defined Problem Statements (PS)

PS No.	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Ms. Priya, a National Olympic Committee performance strategist planning national sports funding for upcoming Olympic cycles.	Identify high-yield sports categories to invest in and maximize our national medal haul.	It is difficult to determine where our athletes are most competitive across 60 countries and 50 sports categories.	Historical medal data spanning 1992–2026 is massive, fragmented, and lacks clear per-athlete yield metrics.	**Uncertain and anxious about misallocating limited national sports development funds.**
PS-2	Mr. Carlos, a senior investment analyst at an international sports fund allocating grants across regions.	Evaluate the relationship between national sports capital investment and actual medal efficiency.	It is challenging to spot overperforming, under-resourced nations that deserve grant funding.	Traditional metrics focus heavily on total medal tallies of wealthy nations rather than regional efficiency percentages.	**Frustrated by capital inefficiency and risk of overlooking high-potential underfunded regions.**
PS-3	William Robert, a global broadcast data journalist creating a documentary on modern Olympic history.	Craft compelling, data-backed narratives on host nation dominance and historical medal trends.	Synthesizing 34 years of multi-game trends into visual, audience-engaging story arcs is complex.	Historical medal totals fluctuate significantly (305 in 2000 vs. 363 in 2020) and host advantage data is scattered.	**Overwhelmed by data density and pressured to deliver clear, dramatic broadcast visual stories.**
