Customer Journey Map

Global Olympic Sports Performance Analysis — Stakeholder Experience Map

Date: 15 March 2026	**Team ID:** NOC-PERF-2026
Project Name: Global Olympic Sports Performance Analysis	**Maximum Marks:** 2 Marks

Stage-by-Stage Experience Mapping Across Key Stakeholders

Phase of Journey	Stage 1: Discovery & Needs Identification	Stage 2: Dashboard Interaction & Data Analysis	Stage 3: Decision-Making & Narrative Delivery
Actions (What does the customer do?)	Ms. Priya searches for historical athlete data across 50 sports; Mr. Carlos reviews historical grant yields; William Robert collates 1992-2026 medal trends.	Filters Tableau dashboard by country (USA/China), sport category (Rowing/Shooting), host status (Japan 105), and regional investment efficiency.	Ms. Priya drafts NOC sports budget allocation memo; Mr. Carlos grants funding to South America (49.64%); William Robert produces broadcast documentary.
Touchpoints (What part of the service do they interact with?)	Raw datasets (`athletes`, `medal_results`), initial project briefing documents, and historical Olympic archives.	Interactive Tableau Dashboards (Horizontal Bar Charts, Investment vs. Medal Bubble Chart, Regional Donut Chart, Trend Line).	Final executive presentation decks, grant committee decision portals, global television broadcast scripts.
Customer Thoughts (What is the customer thinking?)	"Which sports categories give us the highest return per athlete? How do we stop wasting sports budget?"	"Rowing delivers 6.916 medals/athlete; South America has 49.64% regional efficiency despite lower funding!"	"We now have undeniable visual proof to reallocate sports investment and tell high-impact Olympic stories."
Customer Feelings (What is the customer feeling?)	Anxious, overwhelmed by 34 years of fragmented data, and uncertain about budget choices.	Engaged, empowered, and confident as visual trends reveal hidden investment efficiencies.	Accomplished, relieved, and motivated to execute data-driven sports decisions.
Process Ownership (Who is in the lead on this?)	Data Engineering Team & Business Intelligence Analyst.	Tableau Visualization Specialist & BI Developer.	Executive Stakeholders (NOC Strategist, Senior Grant Director, Media Executive).
Opportunities (How can we improve this stage?)	Automate data cleaning pipelines and combine multi-year CSV sources into a central cloud data warehouse.	Incorporate predictive forecasting models for upcoming 2028/2032 Olympic cycles directly into Tableau.	Create downloadable PDF reporting templates and automated executive summary exports.
