Project Design Phase-I: Problem – Solution Fit Canvas

Global Olympic Sports Performance Analysis (1992–2026)

Date: 19 September 2026	**Team ID:** PNT2026TMID092418
Project Name: Global Olympic Sports Performance Analysis	**Maximum Marks:** 2 Marks

Problem – Solution Fit Canvas Blocks (10 Core Dimensions)

1. CUSTOMER SEGMENT(S) [CS]
• NOC Performance Strategists (Ms. Priya)
• International Funding Analysts (Mr. Carlos)
• Olympic Media Data Journalists (William Robert)

6. CUSTOMER CONSTRAINTS [CC]
• Fixed national sports budgets.
• Political pressure from domestic federations.
• Fragmented historical data (1992–2026).
• Difficulty measuring per-athlete yield.

5. AVAILABLE SOLUTIONS [AS]
• Legacy raw Excel spreadsheets.
• Total medal count tallies (wealthy nation focus).
• Manual static news reporting.
• *Drawback:* Lacks per-athlete yield & efficiency %.

2. JOBS-TO-BE-DONE / PROBLEMS [J&P;]
• Identify high-density sports (Rowing: 6.92 yield).
• Evaluate sports investment vs. medal ROI.
• Spot high-efficiency underfunded nations.
• Broadcast data-backed host advantage stories.

9. PROBLEM ROOT CAUSE [RC]
• Raw historical data across 34 years is unstructured.
• Traditional focus is on total medals rather than per-athlete density or investment efficiency.
• Lack of centralized visual BI tools.

7. BEHAVIOUR [BE]
• Manually cross-referencing multi-game CSV files.
• Allocating sports grants based on legacy reputation.
• Searching for engaging storylines ahead of upcoming Olympic cycles.

3. TRIGGERS [TR]
• Upcoming Olympic cycles requiring budget shifts.
• Annual grant distribution deadlines.
• Production of major multi-episode broadcast documentaries.

10. YOUR SOLUTION [SL]
Tableau Olympic Performance BI Suite:
• Horizontal Bar Charts: Per-athlete yield (Rowing/Shooting).
• Bubble Charts: Investment vs. Medals.
• Regional Efficiency: Pie charts (South America 49.64%).
• Line Charts: 1992–2026 total medal trends.

8. CHANNELS OF BEHAVIOUR [CH]
8.1 Online: Tableau Public/Server, interactive dashboards, cloud database portals.
8.2 Offline: Executive board presentations, grant committee meetings, broadcast TV.

4. EMOTIONS: BEFORE / AFTER [EM]
• **Before:** Uncertain, anxious about budget misallocation, overwhelmed by massive historical datasets, frustrated by capital inefficiency.
• **After:** Confident in data-backed investments, empowered by clear visual benchmarks, accomplished in delivering compelling media narratives.

Canvas Summary & Strategic Fit Alignment
The solution directly aligns customer needs (NOC strategy, grant efficiency, media storytelling) with interactive visual analytical tools, resolving root causes of data overload and budget misallocation.

Validation Status
• Fit Score: High
• Target Audience: NOCs, Funding Agencies, Broadcast Networks
• Data Scope: 1992–2026 (60 countries, 50 sports)
