Dashboard Design Specification & Tableau Analytics

Global Olympic Sports Performance Analysis Tableau Suite

Date: 24 September 2026	**Team ID:** PNT2026TMID092418
Project Name: Global Olympic Sports Performance Analysis	**Maximum Marks:** 5 Marks

Activity 1: Interactive and Visually Appealing Dashboards

Creating an effective Tableau dashboard involves thoughtful design principles to ensure that historical Olympic performance metrics are presented clearly and interactively. Key principles applied include:

• **Clear and Intuitive Layout:** Structured top-level KPI summary header (Total Medals, Participating Countries, Top Sport Category) followed by interactive visual charts.

• **Use Appropriate Visualizations:** Horizontal bar charts for per-athlete yield, bubble charts for investment vs. medals, line charts for multi-year trends, and donut charts for regional efficiency.

• **Colour and Theming:** Professional slate blue theme (`#1A365D`, `#2B6CB0`) with dedicated color accents for host nations and efficiency percentages.

• **Interactive Filters and Slicers:** Global quick-filters for Country, Sport Category, Olympic Year (1992–2026), Season (Summer/Winter), and Geographic Region.

• **Drill-Down Capabilities:** Inter-dashboard action filters allowing users to select a country or sport category to highlight granular athlete achievements.

• **Responsive Design:** Optimized layout container settings for clear rendering across desktop monitors and web portals.

• **Custom Visuals and Icons:** Visual callout icons for host nation dominance and medal efficiency indicators.

Major Outcomes & Key Findings from Tableau Dashboard

1. High Per-Athlete Yield in Rowing and Shooting: The horizontal bar chart reveals that Rowing achieves **6.916 average medals per athlete** and Shooting achieves **6.731**, establishing clear evidence for NOCs to prioritize funding in high-density sports.

2. Global Powerhouse Performance: Top-performing nations are led by the **United States (735 total medals)** and **China (696 total medals)**, establishing the competitive international benchmark.

3. Investment vs. Medal Efficiency Highlights Overperformers: The Global Sports Investment vs. Medal Performance bubble chart reveals high efficiency in nations like **Slovakia, Georgia, and Ethiopia**, which deliver strong medal returns relative to lower capital budgets.

4. Regional Efficiency Led by South America: The regional donut chart confirms that **South America leads regional efficiency at 49.64%**, followed by Europe/Asia at **45.98%**, guiding grant allocation decisions for international development funds.

5. Host Nation Dominance & Multi-Decade Trends: The host comparison bar chart highlights **Japan with 105 host medals**, followed by the USA (100) and China (93), while the historical trend line traces total medals awarded swinging from **305 in 2000** to **363 in 2020**, recording **334 in 2026**.
