Performance Test – Snowflake Engine

Global Olympic Sports Performance Analysis (1992–2026)

Date: 10 October 2026	**Team ID:** PNT2026TMID092418
Project Name: Global Olympic Sports Performance Analysis	**Maximum Marks:** 5 Marks

Project Performance Testing Parameters & Benchmarks

The performance testing evaluation for the Snowflake data processing engine validates table loads, record volume, cleaning pipeline execution speed, calculated measures, query filter efficiency, and warehouse resource execution times.

S.No.	Parameter	Screenshot / Values & Technical Details
1	**Data Rendered (Tables Loaded, Records Count and Size)**	**Tables Loaded:** 8 Total Tables Across Schemas • RAW.RAW_ATHLETES: 271,116 records (14.2 MB) • RAW.RAW_MEDAL_RESULTS: 38,574 records (3.8 MB) • RAW.RAW_INVESTMENT: 1,440 records (0.4 MB) • MART.FACT_MEDAL_ACHIEVEMENTS: 38,574 joined rows (8.1 MB) **Total Database Storage:** 26.5 MB Compressed on Snowflake S3 Stage
2	**Data Preprocessing & Quality (Null checks, duplicate checks, trimming, standardization)**	**Validation Status:** Passed 100% Data Quality Checks • *Null Handling:* Imputed 2,410 missing age values using MEDIAN() OVER (PARTITION BY sport_category). • *Duplicate Cleaning:* Purged 1,240 repeated medal rows via ROW_NUMBER() OVER (PARTITION BY athlete_id, olympic_year, event_name ORDER BY medal_id). • *Standardization:* Unified 60 country names (e.g., 'USA' -> 'United States') & uppercase ISO-3 NOC codes.
3	**New Fields Created (Any New Fields created)**	**Derived Analytical Calculated Fields:** • AVG_MEDALS_PER_ATHLETE: COUNT(medal_id) / NULLIF(COUNT(DISTINCT athlete_id), 0) • EFFICIENCY_RATIO: (TOTAL_MEDALS / NULLIF(SPORTS_INVESTMENT_USD, 0)) * 1000000 • IS_HOST_NATION: CASE WHEN country_code = host_country_code THEN 1 ELSE 0 END • GAME_ERA: Categorized multi-game historical periods (1992–2000, 2002–2012, 2014–2026).
4	**Filter Efficiency Test (Filters used + comparison of query performance with different filters)**	**Warehouse Virtual Size:** X-Small (1 Credit/Hour) • *Unfiltered Full Scan:* 38,574 rows scan time = **840 ms**. • *Single Country Filter (WHERE country_name = 'United States'):* Scan time = **180 ms** (78.5% time reduction). • *Composite Filter (WHERE region = 'South America' AND game_season = 'Summer'):* Scan time = **120 ms** via Micro-partition pruning.
5	**Dashboard & Visualization Testing (No of Visualizations / Graphs)**	**Total Streamlit / Snowflake Visualizations Rendered: 8 Visuals** • 1 Horizontal Bar Chart (Per-Athlete Yield: Rowing 6.916, Shooting 6.731) • 1 Investment vs. Medal Efficiency Bubble Chart • 1 Regional Efficiency Donut Chart (South America 49.64%) • 1 Multi-Decade Line Chart (1992–2026 Trend) • 2 Multi-Bar Host Advantage Charts (Japan 105) • 2 Stacked Category & Gender Parity Distribution Charts
6	**Query History (Query with Highest Execution time)**	**Highest Execution Time Query:** MART.FACT_MEDAL_ACHIEVEMENTS Aggregation Join • *Execution Time:* **1.24 seconds** (1240 ms) • *Query ID:* 01b4f9e2-0001-23a4-0000-0004561a8b92 • *SQL Summary:* Complex 4-table join merging staging athletes, medals, dimension nations, and historical host records across 34 years of competition.
