Project Phase: Demonstration & Communication

Communication Plan & Challenge Resolution

Date: 15 March 2026	**Team ID:** PNT2026TMID092418
Project Name: Global Olympic Sports Performance Analysis	**Maximum Marks:** 1 Mark

Communication Plan

S. No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	**Team Standup**	Daily	Slack / MS Teams	All Team Members	Synchronize daily tasks, address blockers, and track sprint burndown progress.
2	**Progress Update**	Weekly	Zoom / Google Meet	Team Lead, BI Analysts, Data Engineers	Review sprint deliverables, check Snowflake SQL transformation pipelines, and update story points.
3	**Issue / Bug Discussion**	As Needed	Jira / Slack Channel	QA Lead, Data Analysts, Developers	Resolve data quality issues (NULLs, duplicate medal records) and fix query performance bottlenecks.
4	**Stakeholder Review**	Bi-Weekly	Executive Presentation (Zoom)	Project Sponsor, NOC Strategist (Priya), Grant Analyst (Carlos)	Demonstrate interactive Tableau dashboards, validate per-athlete yield metrics, and gather feedback.
5	**Final Demo Rehearsal**	Once	MS Teams Live Stage	Full Project Team & Advisory Mentor	Conduct full dry-run of the presentation, live Streamlit dashboard demo, and Q&A; handling.
6	**Retrospective Meeting**	Post-Sprint	Miro Board	Scrum Master & Team Members	Evaluate team velocity, document lessons learned, and finalize scalability roadmap.

Communication Challenges & Resolutions

S.No	Challenge Faced	Resolution / Action Taken
1	**Discrepancy in metric definitions between raw athlete data and aggregated NOC yield calculation (Rowing 6.916 vs raw totals).**	Established a standardized data dictionary and automated Snowflake SQL curated views (`VW_PER_ATHLETE_YIELD`) accessible by all team members.
2	**Delay in rendering interactive Tableau dashboard parameter filters when querying 34 years of historical data (1992–2026).**	Implemented Snowflake data extract caching (.hyper format) and optimized micro-partition filters to achieve sub-1.2 second response times.
3	**Coordination challenges during live presentation rehearsing across different technical roles (Data Engineers vs BI Storytellers).**	Created a timestamped Demo Script and assigned clear presentation boundaries for each persona scenario (Priya, Carlos, William Robert).
